*The data are weighted by age, gender, race, and parish [county], to make the sample as representative as possible of Greater New Orleans. Still, the sample may not be fully representative of stayers/leavers, or of some particular communities and neighborhoods.*

*This survey was conducted by a variety of methods, in a variety of communities, over a substantial period to time (summer 2006 through spring 2011).*

*This long time period, in particular, should be kept in mind when interpreting results.*

*The results shown here are based on the questionnaire in use during 2009-2011.*

*Cells marked "a" are missing answers because the samples were collected before a particular question was used.*

*The following samples were asked during particular time periods:*

*Vietnamese: 2009*

*Jewish: 2006, with some questions repeated in 2010*

*Social Aid & Pleasure Club Members: 2009*

*Residents of Evacuee Trailer Villages: 2007*

*Other samples were conducted throughout the 2006-2011 period.*
